

CPR for a Baby

1

Check the baby and the baby's ABCs (Airway, Breathing, Circulation).

If the baby is unresponsive and not breathing normally, call EMS/9-1-1 and get an AED or have someone else do this.

2

Place 2 fingers in the centre of the baby's chest.

Do 30 chest compressions: Push deeply and steadily.

3

Open the airway by tilting the head back and lifting the chin.

Place your barrier device over the baby's mouth and nose.

Give 2 breaths.

4

Repeat cycles of 30 chest compressions and 2 breaths.

Continue CPR until an AED arrives or more advanced care takes over.

The information in this poster does not replace formal First Aid & CPR training.
